

Telecom - Customer Churn Project

Login page for the Prodapt telecom churn analytics platform, where users sign in with a username and password to access the app.

Dashboard showing the key churn metrics at a glance — total customers, overall churn rate, number of partners tracked, and the partner with the highest churn — along with charts for churn rate by partner and customer distribution across partners.

Continuation of the dashboard, showing the age distribution of customers, the male vs. female split by partner, and the risk distribution of customers across low, medium, and high risk.
